

Custom Software Development

In addition to our experience in designing off the shelf computer based training courseware, WorkPlace Training stands ready to assist in any software development needs you may have.

The number one complaint we hear is that software is *not easy to use* and *poorly designed*. Don't make the *mistake of having engineers develop training* for their own software applications.

Whether your project is training, software tutorials, product training, simulations, virtual reality

Our staff can help in...

- IDENTIFYING TECHNICAL REQUIREMENTS
- PROTOTYPE DEVELOPMENT
- TESTING, SCORING, RESULTS COMPILATION, RECORD KEEPING AND CERTIFICATE PRINTING
- FLASH PROGRAMMING
- NEEDS ANALYSIS
- DEFINING CONTENT AND CURRICULUM
- DETERMINING INSTRUCTIONAL DESIGN
- GRAPHIC DESIGN AND SOURCING
- VALIDATION
- INTEROPERABILITY PROGRAMMING
- SYSTEMS DESIGN

● *We have completed or have underway projects for a range of customers on a variety of applications including...*

EDISON ESI

Software tutorial, proprietary laboratory management tool

FORD MOTOR COMPANY

Online/Instructor training for multicultural awareness

CERTIFIED CALIBRATION TECHNICIAN

Content and test preparation, practice testing components
